 - b) Phase Two
 - c) Phase Three
5. NFT Economics & Payment Breakdown

What are NFTs?

NFTs, or non-fungible tokens, are a new type of digital asset. Ownership of these assets are recorded on a blockchain — a digital ledger similar to the networks that bitcoin and other cryptocurrencies.

But unlike most virtual currencies, you couldn't exchange one NFT for another in the same way that you would with dollars or gold bars. Each NFT is unique and acts as a collector's item that can't be duplicated, making them rare by design.

You can think of them like the crypto alternative to rare Pokémon or baseball cards.

The rise of the internet meant that anyone could view images, videos and songs online for free. People are buying NFTs out of the belief that they'll be able to prove ownership of a virtual item thanks to blockchain.

Why are they so popular?

The coronavirus pandemic played a big role in the NFT boom. Last year, the total value of NFT transactions quadrupled to \$250 million, according to a study from NonFungible and BNP Paribas-affiliated research firm L'Atelier.

That's in no small part because of stay-at-home restrictions that resulted in people spending a lot more of their time on the internet and saving cash from a lack of commuting. It's similar to the rise of retail traders betting on GameStop and other historically unloved stocks promoted on the Reddit board WallStreetBets.

Meanwhile, it also arrives at a time when bitcoin, ether and other digital coins have surged in value, with bitcoin briefly topping \$1 trillion in market value last month.

"Right now we're living in a point in the world whereby the majority of the population is spending 50% of their time online and a significant amount of their time on a PC," Whale Shark, a pseudonymous NFT collector who claims to have amassed a collection worth over \$2.7 million, told CNBC.

WELCOME TO AFBN REVENUE SHARING!

An NFT you can buy with Credit or Debit Cards, PayPal, G-Pay, or MetaMask that's delivered through the BSC Blockchain where each NFT acts as 1 equal share to displace revenue from several avenues of A Few Bad Newbies back to the holders as cash rewards.

Earn like a Pro, with A Few Bad Newbies.

50% of YouTube Revenue
50% Merchandise Revenue
20% of Casino Bet-losses
20% of NFT Sales

All Shared Back to the NFT Holders proportionately.
+ future projects (TBA) adding % to the Revenue Pool.

AFBN Revenue Sharing - Utility YOU Control

Every NFT Holder of AFBN Revenue Sharing is able to control how much money they earn every year. By the amount of time they spend watching and interacting with the content that we provide, assisting in how many merchandise items are sold, imploring someone to try our online casino, and overall extending our social networking reach, you control how much each NFT is worth.

Every NFT Holder of AFBN Revenue Sharing NFT is also able to control how many equal portions they're entitled to with how many NFTs they are holding per platform.

Needless to say, as a whole community, the amount of passive income increases with how much of yourself you invest into the concept. We hope to inspire enough activity to overtake the #1 spot in every avenue of revenue.

AFBN REVENUE SHARING NFT ROADMAP

Phase One:

1. Create NFT with Multiple Utility
2. Create Accounts to be Monetized
3. Create a Community
4. Create AFBN Social Media(s)
5. Create Multi-Currency BSC NFT Marketplace

Phase Two:

1. Create Website
2. Create Whitepaper
3. Create Marketing and Developing Team
4. Create Additional Content for Viewing
5. Recruit or Hire Content Creators

Phase Three:

1. VR/AR Development
2. Create Platform to Pay NFT Holders Cash
3. Create MetaVerse Game
4. Create Future Utility
5. Create Cryptocurrency
6. In-Person Real Estate & Development

A FEW BAD NEWBIES FINANCIAL BREAKDOWN

Revenue Sharing BSC NFT

\$250 each flat rate. 100,000 available. \$25,000,000 accumulated.
