

Are you interested in changing the world? How about getting money passively while building a better future? Well, this is that opportunity.

Turning a one time investment into a lifetime of passive Cash Income just by holding an NFT on the blockchain is possible, and here's how!

By purchasing at least one NFT, your wallet address will automatically be entered in several raffles where winner's receive grandiose prizes such as a chance to win \$1,000 every 100 NFT sales and two opportunities (one at half supply and the other at full supply release) to win the package prize which is: \$10,000 Cash. Brand New Fully Decked Out Tesla Model Y. And 1yr Car Insurance in the winners name for that Tesla.

Your purchases and contributions will allow for all SEC/Legal Paperwork to be filed, Offshore Gambling License to be procured, allow the creation of an app/program to displace claimable cash, and allow immediate progression of our roadmap.

The more NFTs held, the more passive income obtained because every NFT has an equal share allocated to it. 1 NFT means 1 equal share. 10 NFTs means 10 equal shares. But raffle winners are chosen by wallet address.

What more is there to say? Join the future with an NFT Utility You Control. Become an Investor of A Few Bad Newbies LLC., eSports Organization and Gaming Website Empire and get rewarded for the Organization's success without ever having to sell your NFT. A one time investment with forever passive income based on several facets of revenue.

A Few Bad Newbies Financial Breakdown:
